

Train the Trainer is a **capability-building** programme and consists of **two training programs**:

In the first program (Train the Trainer on *Research Infrastructure Commercialization Academy*), it provides training to academic and non-academic staff (HEIs key personnel) on how to build capacity among other academic and non-academic staff of HEIs (e.g. scientist, manager/director, specialist/technician, researcher, research assistant, commercialisation specialist, IP specialist, etc.) involved in management and commercialisation of research infrastructures relevant to contemporary food and health systems by using best commercialisation practices, tools and techniques, enabling them to boost the use of such infrastructure for industrially oriented research, contract R&D, entrepreneurial activities of startups and spin-offs and cross-border collaboration.

In the second program (Train the Trainer on *New Product Development Labs*), it provides training to academic and non-academic staff (HEIs key personnel) on how to leverage HEIs accumulated scientific knowledge for co-creation with stakeholders through the use of gamification elements to stimulate ideation/concept development by consumers/patients participating in the process. NPD Labs focused on ideation/development of new food and beverage products, dietary supplements, nutraceuticals, OTC drugs, and customisation of pharmaceutical products (incl. changes to drug delivery pathways, packaging, and product sensory dimensions).

Train the Trainer programme on Research Infrastructure Commercialization Academy will be held **online** on the **21st, 25th and 28th of November 2022**.

Train the Trainer programme is part of the InterHEI project, a pan-European consortium realizing the Interdisciplinary HEI Entrepreneurship Fostering Program. The InterHEI, under the leadership of the University of Warsaw, brings together consortium partners from Greece, Italy, Poland, Serbia, Slovakia, Spain, Turkey, and Ukraine, providing high-quality knowledge and best practices in the food and health area.

For more information about Train the Trainer programme, please visit the dedicated website at <https://www.interhei.eu>.

The application deadline is **7th November 2022**.

Participant do not pay tuition fee.

Train the Trainer programme on Research Infrastructure Commercialization Academy is delivered by **University of Warsaw** within EIT HEI Initiative as a key objective of the European Institute of Innovation and Technology (EIT).
