

TA4 / Transnational learning, teaching, and training activity “Adjust design of educational materials for green skills”

2nd - 6th of December 2024

organised and hosted by the the UNIVERSITY OF RUSE "Angel Kanchev" / Ruse, Bulgaria

CALL FOR APPLICATIONS FOR THE SELECTION OF TEACHERS

Project objective - Design an innovative educational model, framed by trans-disciplinary and forward-looking approaches, integrating learning outcomes for complex skills development, more conducive to new forms of cooperation for greening jobs & enterprises, maximising the impact on partners.

With an increasing interest of organisations in new trends such as workplace digitisations and intelligence skills for sustainable green business creation, the project partners invite teachers to apply for the intensive study programme aimed to enhance the readiness to resolve complex economic, environmental, and social development issues

1. What training is all about?

To design modern and innovative educational resources with trans-disciplinary knowledge and concepts fuelled with good practices and multicultural views on greening jobs & enterprises, and promoting environmentally sustainable economies, suitable for HE students and practitioners.

2. What are the benefits for participants?

- Provides a joint learning experience with transnational learning, teaching, and training for green skills and environmental progress.
- To add value through multicultural and trans-disciplinary approaches to greening jobs & enterprises
- To perform transnational learning, teaching and training activities on relevant knowledge and good practices

The selection criteria: are learning performance, excellent English language, motivation, proactive attitude, teamwork and adaptability in multicultural settings, and willingness to share experience.

The interested shall communicate and send their CV to the local partners at least one week before training starts:
