

Kick-start your career in a 12-month global program designed to develop future key positions and leaders through real business impact, senior mentoring, and international exposure.

Global Graduate Accelerator - Global IT Poland

Workplace: Warszawa
76042693

Your responsibilities

- / Deploy generative AI models and AI systems;
- / Support Solution Architect in operational tasks concerning AWS infrastructure;
- / Collaborate with ML Ops Engineers in discovering, evaluating and prototyping new tools and frameworks;
- / Routinely contribute to improving technical maturity of the team;
- / Present findings to the team and both tech and business stakeholders.

Your benefits

- / Structured 12-month development: Three distinct assignments offer broad business and cultural insights.
- / Clear home-country perspective: After the program, you will continue your career in a long-term role.
- / International exposure with local commitment: Gain global experience while employed on a local contract in your home country.
- / Accelerated development: Targeted learning, challenging projects and close mentorship from senior leaders.
- / Global headquarters experience: A mandatory assignment in Munich builds your international network and business understanding.

Your profile

- / Master degree or comparable and first professional experience in corporate environment;
- / Intercultural experience e.g. through semester or internship abroad and willingness to work in different locations worldwide;
- / Very good English language skills;
- / Strong analytic thinking skills and a business mindset, to master future challenges by contributing with fresh ideas and willingness to go the extra mile;
- / Proficiency in a single language (Python preferred), GenAI stack (Langchain, Langfuse, etc.);
- / Experience with AWS, Vector Databases;
- / Experience with Airflow, Observability tools, Terraform would be an asset;
- / Familiarity with the following AI concepts: Machine Learning models, NLP models, RAG;
- / Knowledge/eagerness to grow in Software Engineering: System design, Coding, Debugging, Version Control, Database Management, Solution Architecture;
- / Experience collaborating daily in a large multinational team.
